

OPERATING INSTRUCTIONS

PMR446 TRANSCEIVER

IC-F29SR

Icom Inc.

INTRODUCTION

FOREWORD

Thank you for choosing this Icom transceiver.

IMPORTANT

FIRST, CAREFULLY READ INSTRUCTIONS

that are provided with the transceiver.

SAVE THIS OPERATING INSTRUCTIONS—

These operating instructions contain additional important operating instructions for the IC-F29SR PMR446 TRANSCEIVER.

Section 1 ACCESSORIES

Accessory attachments

◇ Battery pack

Attach or remove the battery pack, as illustrated to the right.

To attach the battery pack:

- ① Place the tabs on the bottom of the battery pack into the slots at the bottom of the transceiver. (1)
- ② Push the battery pack until the battery release buttons make a 'click' sound. (2)

To remove the battery pack:

- ① Push the battery release buttons in the direction of the arrow as shown to the right. (3)
- ② The battery pack is then released, and you can remove it. (4)

To attach

Battery release buttons

To remove

◇ Belt clip

NOTE: Before attaching or detaching the belt clip, remove the battery pack from the transceiver, if it is attached.

To attach the belt clip:

- ➔ Slide the belt clip in the direction of the arrow until the belt clip locks in place, and makes a 'click' sound. (1)

To detach the belt clip:

- ➔ Lift the tab up (2), and slide the belt clip in the direction of the arrow (3).

To attach

To detach

Accessory attachments (Continued)

◇ Jack cover

CAUTION: The transceiver meets IP67 requirements for dust-tight and waterproof protection, only when the jack cover or the optional HM-168LWP SPEAKER MICROPHONE is attached.

To attach the jack cover:

- ① Place the jack cover over the speaker-microphone jack. (1)
- ② Insert and tighten the screws. (2)

To detach the jack cover:

- ① Unscrew the screws using a Phillips screwdriver. (3)
- ② Detach the jack cover. (4)

Programmable key functions

If you use the CS-F29SR CLONING SOFTWARE (purchase separately), you can assign the functions described below to **[TOP]**, **[Upper]**, and **[Lower]**.

NOTE: Refer to the instruction sheet that comes with the transceiver for the default settings of these keys.

SCAN START/STOP

- Push to start and cancel a scan.
 - When a scan is started with the Power ON Scan or Automatic scan function, push this key to pause it. The paused scan resumes after a set time period.

PRIORITY A CHANNEL, PRIORITY B CHANNEL

- Push to select the Priority A or Priority B channel.

PRIORITY A CHANNEL (REWRITE), PRIORITY B CHANNEL (REWRITE)

- Push to select the Priority A or Priority B channel.
- Hold down to set the operating channel as the Priority A or Priority B channel.

MEMORY CHANNELS 1, 2, 3, 4

- Push to select memory channel 1, 2, 3, or 4.

MONI

- Push to turn the CTCSS (DTCS) mute ON or OFF.
- While holding down this key, the transceiver opens any squelch, or releases any mute.

LOCK

- Hold down to turn the Key Lock function ON or OFF.
 - Even when the Lock function is ON, **[MONI]** and **[SURVEILLANCE]** are not locked.

SURVEILLANCE

- Hold down to turn ON the Surveillance function.
- Push to turn OFF the function.
 - When this function is ON and a signal is received, a beep does not sound and the status indicator does not light, even if you push any key.

SIREN

- Hold down to emit a siren sound.
 - The transceiver keeps emitting the siren sound until the transceiver's power is turned OFF.
 - This function is for situations other than an emergency alert, such as a security alarm.

SCRAMBLER

- Hold down to turn ON the Voice Scrambler function.
- Push to turn OFF the function.

COMPANDER

- Hold down to turn ON the Compander function.
- Push to turn OFF the function.
 - The Compander function reduces noise components from the transmitted audio to provide clear communication.

S-RING/C-RING

- Push to make a Smart-Ring call.
- Hold down to make a Call-Ring call.

ANNOUNCE

- Push to turn the Channel Announce function ON or OFF.
 - The transceiver announces the position of **[Rotary Selector]**.

NOTE: When the Beep function is OFF, the operating channel is not announced, regardless of this setting. (p. 5)

Section 3 LED INDICATOR

About the LED indicator

The LED indicator indicates the status of various parameters of the transceiver as follows:

(Reference: R is Red, G is Green, O is Orange)

- Cloning (reading or writing data)

- Cloning error (if cloning fails)

- Inh, Blank CH, Unlocked (when you cannot use the channel)

- TX Low Battery 1 (while transmitting)

- TX Low Battery 2 (while transmitting)

- Transmitting

- Receiving

- Scanning

- Low Battery 1 (You should charge the battery.)

- Low Battery 2 (You must charge the battery.)

- When turning ON the power

- Making a Smart-Ring call

- Lockout, TX Inh, TOT (when transmit is inhibited)

- Smart-Ring call successful

- Smart-Ring call failed

- Siren

Section 4 SETTINGS

Setting the Beep function

You can turn the Beep function ON or OFF. When it is OFF, the channel announcement is also turned OFF.

NOTE:

You should turn ON the Beep function when you set the beep level, ringer level, microphone gain, squelch level, VOX function, VOX gain, or the group code number to check the current level setting with the beep sounding. (pp. 6–13)

- ① Rotate **[VOL]** to turn OFF the transceiver power.
- ② Set **[ROTARY SELECTOR]** to any channel other than Channel 16.
- ③ While holding down **[Lower]**, rotate **[VOL]** to turn ON the power to enter the Beep Level Adjustment mode.
- ④ Push **[Lower]** to turn the Beep function ON or OFF.
 - When a beep sounds after pushing **[Lower]**, the Beep function is ON. When no beep sounds after pushing **[Lower]**, the Beep function is OFF.
 - The transceiver stores the setting every time you change it.
 - If desired, push **[Upper]** to adjust the beep level. See page 6 for details.
- ⑤ Rotate **[VOL]** to turn OFF the power to exit the Beep Level Adjustment mode.

Setting the beep level

You can adjust the beep level between 1 and 5, or 1 (linked) and 5 (linked). When a linked option is selected, the beep audio level is adjustable by rotating **[VOL]**.

NOTE:

You should turn ON the Beep function (p. 5) before you start setting the beep level.

- ① Rotate **[VOL]** to turn OFF the transceiver.
- ② Set **[ROTARY SELECTOR]** to any channel other than Channel 16.
- ③ While holding down **[Lower]**, rotate **[VOL]** to turn ON the power and enter the Beep Level Adjustment mode.
- ④ Push **[Upper]** to change the beep level.
 - Repeatedly pushing **[Upper]** first selects 1 (lowest) to 5 (highest), and then selects the lowest linked level, 1 (Linked) to the highest, 5 (Linked). Repeatedly pushing **[Upper]** repeats the cycle. See the illustration to the right.
 - The adjustable range is 1 to 5 or 1 (Linked) to 5 (Linked).
 - A beep sounds every time you push **[Upper]**. Therefore, you can determine the current level setting by the increasing loudness of the beep that sounds.
 - To determine if you have selected a linked level, set **[VOL]** to minimum, then push **[Upper]** repeatedly, listening for the loudest beep (level 5). Pushing **[Upper]** once after the loudest beep will select 1 (Linked). Repeatedly push **[Upper]** to select the desired linked level.
- ⑤ Rotate **[VOL]** to turn OFF the power to exit the Beep Level Adjustment mode.

Setting the ringer level

You can adjust the ringer level between 1 and 5, or 1 (Linked) and 5 (Linked). When a linked option is selected, the ringer audio level is adjustable by rotating **[VOL]**.

NOTE:

You should turn ON the Beep function (p. 5) before you start setting the ringer level.

- ① Rotate **[VOL]** to turn OFF the transceiver power.
- ② Set **[ROTARY SELECTOR]** to Channel 16.
- ③ While holding down **[Lower]**, rotate **[VOL]** to turn ON the power and enter the Ringer Level Adjustment mode.
- ④ Push **[Upper]** to increase, or push **[Lower]** to decrease the ringer level.
 - Repeatedly pushing **[Upper]** first selects 1 (lowest) to 5 (highest), and then selects the lowest linked level, 1 (Linked) to the highest, 5 (Linked). Repeatedly pushing **[Upper]** or **[Lower]** repeats the cycle. See the illustration to the right.
 - The adjustable range is 1 to 5 or 1 (Linked) to 5 (Linked).
 - A beep sounds after pushing **[Upper]**. Therefore, you can determine the current level setting by the increasing loudness of the beep that sounds.
 - To determine if you have selected a linked level, set **[VOL]** to minimum, then push **[Upper]** up to 10 times, listening for the loudest beep (level 5). Pushing **[Upper]** once after the loudest beep will select 1 (Linked). Repeatedly push **[Upper]** or **[Lower]** to select the desired linked level.
- ⑤ Rotate **[VOL]** to turn OFF the power to exit the Ringer Level Adjustment mode.

Setting the microphone gain

You can adjust the microphone gain. Higher values make the microphone more sensitive to the user voice.

NOTE:

You should turn ON the Beep function (p. 5) before you start setting the microphone gain.

- ① Rotate **[VOL]** to turn OFF the transceiver power.
- ② Set **[ROTARY SELECTOR]** to Channel 16.
- ③ While holding down **[Upper]**, rotate **[VOL]** to turn ON the power and enter the Microphone Gain Adjustment mode.
- ④ Push **[Upper]** to increase, or push **[Lower]** to decrease the microphone gain.
 - The adjustable range is 1 (minimum) to 4 (maximum).
 - A beep sounds after pushing **[Upper]** or **[Lower]**. An error beep sounds if you try to exceed the adjustable range.
- ⑤ Rotate **[VOL]** to turn OFF the power to exit the Microphone Gain Adjustment mode.

Setting the squelch level

You can adjust the squelch level. The squelch circuit mutes the received audio signal, depending on the signal strength.

NOTE:

You should turn ON the Beep function (p. 5) before you start setting the squelch level.

- ① Rotate **[VOL]** to turn OFF the transceiver power.
- ② Set **[ROTARY SELECTOR]** to any channel other than Channel 16.
- ③ While holding down **[Upper]**, rotate **[VOL]** to turn ON the power and enter the Squelch Level Adjustment mode.
- ④ Push **[Upper]** to increase the squelch level (tight squelch), or push **[Lower]** to decrease the squelch level (loose squelch).
 - The adjustable range is 0 (loose squelch) to 9 (tight squelch).
 - A beep sounds after pushing **[Upper]** or **[Lower]**. An error beep sounds if you try to exceed the adjustable range.
- ⑤ Rotate **[VOL]** to turn OFF the power to exit the Squelch Level Adjustment mode.

Setting the VOX function

You can turn the VOX function ON or OFF. The VOX function automatically switches between receive and transmit during voice operation.

NOTE:

You should turn ON the Beep function (p. 5) before you start setting the VOX function.

- ① Rotate **[VOL]** to turn OFF the transceiver power.
- ② Set **[ROTARY SELECTOR]** to any channel other than Channel 16.
- ③ While holding down **[PTT]** and **[Upper]**, rotate **[VOL]** to turn ON the power, to turn the VOX function ON or OFF.
 - When the VOX function is ON, a beep sounds.
 - When the VOX function is OFF, two beeps sound.
- ④ Rotate **[VOL]** to turn OFF the power, then turn ON again to restart the normal operation.

Setting the VOX gain

You can adjust the VOX gain. Higher values make the VOX function more sensitive to the user voice.

NOTE:

You should turn ON the Beep function (p. 5) before you start setting the VOX gain.

- ① Rotate **[VOL]** to turn OFF the transceiver power.
- ② Set **[ROTARY SELECTOR]** to Channel 16.
- ③ While holding down **[PTT]** and **[Upper]**, rotate **[VOL]** to turn ON the power and enter the VOX Gain Adjustment mode.
- ④ Push **[Upper]** to increase, or push **[Lower]** to decrease the VOX gain.
 - The adjustable range is 1 (minimum) to 10 (maximum).
 - A beep sounds after pushing **[Upper]** or **[Lower]**. An error beep sounds if you try to exceed the adjustable range.
- ⑤ Rotate **[VOL]** to turn OFF the power to exit the VOX Gain Adjustment mode.

Setting the group code number

◆ CTCSS tone setting

The transceiver is equipped with 50 CTCSS tones. CTCSS operation enables silent standby, since you will only receive calls from group members using the same CTCSS tone.

- ① Rotate **[VOL]** to turn OFF the power.
- ② Set **[ROTARY SELECTOR]** to any channel other than Channel 16.
- ③ While holding down **[PTT]**, **[Upper]**, and **[Lower]**, rotate **[VOL]** to turn ON the power.
- ④ Rotate **[ROTARY SELECTOR]** to select the desired channel (1 to 16) that you want to assign the CTCSS tone to.
- ⑤ Hold down **[Upper]** until two beeps sound.
 - The transceiver enters the CTCSS Tone Setting mode.
- ⑥ Push **[PTT]** the necessary number of times to enter the ten's digit of the desired CTCSS tone number (grey column) as shown in the list to the right.
- ⑦ Push **[Upper]**.
 - The selected number will be announced.
- ⑧ Push **[PTT]** the necessary number of times to enter the one's digit of the desired CTCSS tone number (grey column) as shown in the list to the right.
- ⑨ Push **[Upper]** to complete the setting.
 - The selected number will be announced.
- ⑩ Turn OFF the power to exit the CTCSS tone setting mode.

NOTE:

- If you make a mistake, go back to step ① and follow all the steps again.
- If you want to enter "0," do not push **[PTT]** in step ⑤ and ⑦, just push **[Upper]**. Then "zero" will be announced. To turn OFF the CTCSS tone, enter "00."

[Example]: CTCSS tone No. 28 (162.2 Hz) assigned to channel 4

- ① Rotate **[VOL]** to turn OFF the power.
- ② While holding down **[PTT]**, **[Upper]**, and **[Lower]**, rotate **[VOL]** to turn ON the power.
 - The transceiver enters CTCSS Tone Setting mode.
- ③ Rotate **[ROTARY SELECTOR]** to select channel 4, then hold down **[Upper]** until two beeps sound.
- ④ Push **[PTT]** two times to enter "2" (the ten's digit) of the number 28.
- ⑤ Push **[Upper]**.
 - "Two" will be announced.
- ⑥ Push **[PTT]** eight times to enter "8" (the one's digit) of the number 28.
- ⑦ Push **[Upper]** to complete the setting.
 - "Eight" will be announced.
- ⑧ Turn OFF the power to set the CTCSS tone.

• Available CTCSS tone list

(Hz)

								00	OFF

Setting the group code number (Continued)

◆ DTCS code setting

This transceiver is equipped with 84 DTCS codes. DTCS operation enables silent standby, since you will only receive calls from group members using the same DTCS code.

- ① Rotate **[VOL]** to turn OFF the power.
- ② Set **[ROTARY SELECTOR]** to any channel other than Channel 16.
- ③ While holding down **[PTT]**, **[Upper]**, and **[Lower]**, rotate **[VOL]** to turn ON the power.
- ④ Rotate **[ROTARY SELECTOR]** to select the desired channel (1 to 16) that you want to assign the DTCS code to.
- ⑤ Hold down **[Lower]** until two beeps sound.
 - The transceiver enters the DTCS Code Setting mode.
- ⑥ Push **[PTT]** the necessary number of times to enter the ten's digit of the desired DTCS code number (grey column) as shown in the list to the right.
- ⑦ Push **[Upper]**.
 - The selected number will be announced.
- ⑧ Push **[PTT]** the necessary number of times to enter the one's digit of the desired DTCS code number (grey column) as shown in the list to the right.
- ⑨ Push **[Upper]**.
 - The selected number will be announced.
- ⑩ If you want to use Inverse mode, push **[PTT]** again.
 - If you want to use Normal mode, skip this step.
- ⑪ Push **[Upper]** to complete the setting.
- ⑫ Turn OFF the power to exit the DTCS Code Setting mode.

NOTE:

- If you make a mistake, go back to step ① and follow all the steps again.
- If you want to enter "0", do not push **[PTT]** in step ⑤ and ⑦, just push **[Upper]**. Then "zero" will be announced. To turn OFF the DTCS code, enter "0."

[Example]: DTCS code No. 16 (114) Inverse mode assignment to channel 5

- ① Rotate **[VOL]** to turn OFF the power.
- ② While holding down **[PTT]**, **[Upper]**, and **[Lower]**, rotate **[VOL]** to turn ON the power.
 - The transceiver enters DTCS Code Setting mode.
- ③ Rotate **[ROTARY SELECTOR]** to select channel 5, then hold down **[Lower]** until two beeps sounds.
- ④ Push **[PTT]** one time to enter "1" (the ten's digit) of the number 16.
- ⑤ Push **[Upper]**.
 - "One" will be announced.
- ⑥ Push **[PTT]** six times to enter "6" (the one's digit) of the number 16.
- ⑦ Push **[Upper]**.
 - "Six" will be announced.
- ⑧ Push **[PTT]** again, to use Inverse mode.
- ⑨ Push **[Upper]** to complete the setting.
- ⑩ Turn OFF the power to set the DTCS code.

• Available DTCS code list
